## EXPLANATION OF ABBREVIATIONS.

M—Miles. N—North. S—South. E—East. W—West. Ry or Rys—Railway or Railways.

\* Not a Post Office, and no report received as to what Post Office mail should be addressed to reach this place.

All counties, towns, cities, villages, etc., are indexed in the following manner  
“**Brazil**, Clay, G-16, (Rys 11, 69), 3530.”

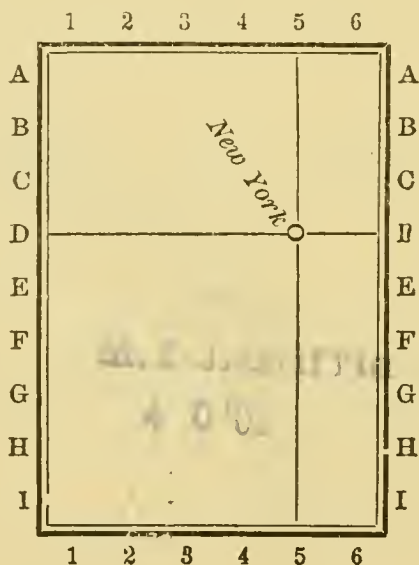

“Black Hawk Mills, Posey, 7 m S E Mount Vernon. B-26, *mail* West Franklin, 100.”

Brazil being in *black type* indicates that it is the county seat of Clay county; G-16 shows where it can be found on the map (see example below); that it is a station upon each of the railways 11 and 69 (see list of railways, which are consecutively numbered and alphabetically arranged); 3530 is the population of Brazil, according to the census of 1880.

Black Hawk Mills is in Posey county, seven miles southeast of Mount Vernon, and that mail for this place should be sent to West Franklin Post Office; population 100, Census of 1880.

The letters and figures following names (like G-16 above) refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find “*New York City*, D 5;” let the diagram below represent the map. New York is seen near the crossing of lines D—D and 5—5.

Entered according to Act of Congress, in the year 1883, by

RAND, McNALLY & CO.,

In the Office of the Librarian of Congress, at Washington.
